SUMMARY

Computer Science graduate with hands-on experience building mobile and web applications using Flutter, Next.js, Django REST Framework, Firebase, and Supabase. Experienced in developing full-stack systems, RESTful APIs, analytical dashboards, and real-time applications through internships, leadership roles, and academic projects. Skilled in building responsive and data-driven applications with strong interests in scalable software engineering and modern web technologies.

EXPERIENCE

Fullstack Developer at Geopro Global Solutions

December 2025 - March 2026

- Developed analytical dashboards and data-driven pages using Next.js and Django REST Framework to support business reporting and operational insights.
- Built and maintained RESTful API endpoints to support frontend data requirements and efficient backend communication.
- Integrated frontend applications with backend services to enable seamless data flow and visualization.
- Contributed to the development of a human resource management platform that allowed applicants to submit applications and HR managers to review candidate information.

Mobile Development Lead (Google Developer Groups - Holy Angel University)

May 2025 - April 2026

- Assisted members in learning Flutter and mobile application development concepts.
- Supported technical discussions and contributed to development-related activities within the organization.

FEATURED PROJECTS

Signal Check PH - Traffic Simulation App

November 2025 - Present

- Developed an interactive traffic simulation PWA using Next.js and Supabase.
- Integrated Supabase Authentication and offline functionality for reliable application access.
- Assisted in developing UI components and interactive features.

GDG - Hackathon Website

October 2025 - November 2025

- Contributed to the development of the official GDG HAU Hackathon website.
- Developed responsive frontend components and interactive sections using React and Tailwind CSS.
- Improved overall user engagement and accessibility through modern UI implementation.

Stock Route - Inventory Management Website

September 2025

- Designed and implemented responsive interfaces for inventory management, stock updates, and category management.
- Developed interactive frontend components using React and Tailwind CSS to improve usability and user experience.
- Built clean and organized UI layouts optimized for desktop and mobile viewing.

Clarity -Air Quality Monitoring App

January 2025 - September 2025

- Developed a real-time mobile monitoring application using Flutter to display restroom air quality data and system notifications.
- Implemented Firebase Authentication, Cloud Firestore, and Firebase Cloud Messaging to support secure authentication, real-time updates, and push notifications.
- Collaborated with the team on testing, debugging, and feature improvements to ensure stable application performance.
- Contributed to a system designed to assist janitors and administrators in monitoring restroom air quality conditions.

EDUCATION AND CERTIFICATIONS

Education

- Bachelor of Science in Computer Science | Holy Angel University (2022 - 2026)

Certifications

- The Complete Flutter Development Bootcamp (Udemy)
- The Complete Full-Stack Web Development Bootcamp (Udemy)

SKILLS

Languages

- Dart, JavaScript, Python, SQL, HTML, CSS

Frameworks & Libraries

- Flutter, React, Next.js, Django, Django REST Framework, Node.js

Backend & Databases

- Firebase, Cloud Firestore, Firebase Authentication, Firebase Cloud Messaging (FCM), Node, Supabase, PostgreSQL

Tools & Platforms

- Git, GitHub, AWS, Tailwind CSS

Soft Skills

- Communication, Team Collaboration, Adaptability, Problem Solving, Leadership
